

M474016W -- Saddle, Wiretong

Chance Pole Type Wire Tong Saddles are made of lightweight aluminum for handling ease. These rugged heat-treated saddles will support a maximum of 1000 pounds (450kg) without the extension. The clamp is set far enough away from the base to give ample clearance for most jobs. Where additional clearance is required, the Chance Wire Tong Saddle Extension can be easily bolted to the saddle. This heat-treated aluminum-alloy extension is 4 inches (100mm) long and has a tested working load rating of 800 pounds (360kg). The Wheel Type fasteners are easy to apply, hold the saddle firmly in place, and prevent riding down and excessive play. The Wheel Tightener has the advantage of being able to fit into close places such as between crossarm braces, under guy wires, etc.

Product Specifications

Product Type	Conductor Support
Tool Type	Wire Tong Saddle
Style	Pole Saddle, Tightener, Pole Clamp, & Extension
Diameter	1.5" (38 mm)
Material Type	Non-Standard
UPC Code	09635904807
Standard Package	1
